

Information Security Conference 2012

“Cutting-edge Frontiers & Challenges”

Lahore Expo Center, January 9th, 2012, 1 PM to 6:30 PM

- Cloud Security-Web & Application Security-Network Security-
- Hacking Threats-Security Governance Standards-Social Media-

Information Security conference 2012 will bring together leading Information Security experts, thought leaders, professionals, academia, researchers, industry, and government sector officials from all over Pakistan. As the new year (2012) dawns, this conference will examine the latest and cutting-edge trends and challenges that face the Information Security community.

- **Cloud Computing & Cloud Security**
- **Web & Application Security**
- **Global Update On Information Security & IT Governance Standards**
- **Social Media Security**
- **Mobile Device Security**
- **Botnets & Malware Update**

The technology paradigm is drastically transforming with the introduction of **cloud computing**, **social media** and **collaboration platforms**. Information Security professionals need to keep pace with not only these **latest technology** developments, but also the new threats that enterprises face today. Similarly, focus is shifting at an ever-increasing pace not only to protect the network and infrastructure but also the **application** itself (**web and application security**). Moreover, hackers are continuously gearing up to launch highly sophisticated and coordinated attacks on enterprises and networks.
